

## Villas of Asbury Controller Settings

This schedule, when sprinklers run, is a general overview. The start time for the controller area means that a zone or zones for that controller begin at that time, but does not mean that all zones for that controller begin at that time. For example, a building zone with a start time of 8:30 p.m. covering several buildings means that some zones do not run until much later after the start time. Turf zones generally are the common areas; shrub zones generally are the mulched areas adjacent to the units.

We cannot work on questions about sprinklers not working if we do not hear about them. If you have sprinklers you want to have checked, please send an email to [tim@tiehengroup.com](mailto:tim@tiehengroup.com) or [hoaboard@asburyvillas.com](mailto:hoaboard@asburyvillas.com)
